WESTERN BUS
SALES & SERVICE

THE SCHEDULE

Tuesday, August 1st

Start with general legacy electrical troubleshooting, then take a deep dive into Blue Bird's new electrical architecture (NEA) system on the Type C Vision product plus Vantage portal

Wednesday, August 2nd

Learn all about Blue Bird's Electric Powered school buses, including safety, unique components, charging process, and more

Thursday, August 3rd

Today's focus will be on the ROUSH CleanTech propane and gasoline powertrains including components, maintenance, and repair

IMPORTANT DETAILS

Due to the level of interest in these classes, we will be limiting the training to two (2) technicians per school district. We will offer a wait list if there is available space.

You can register for one, two, or all three days of training.

There is no cost for the training. Attendees are responsible for their own travel & lodging costs.

Light breakfast and lunch provided each day.

For more information, call (800) 258-2473
