Exclusive Ford/ROUSH CleanTech Parts

Ford / ROUSH CleanTech Parts Catalog

Thank you for including Blue Bird Alternative Fuel buses as part of your fleet! There are many reasons to choose Blue Bird buses powered by Ford and ROUSH CleanTech, including:

- **Proven Technology:** Blue Bird has over 10,000 Ford / ROUSH CleanTech propane buses in operation, with over 50 million miles driven. That's over ten times the number propane buses in operation today versus our competition combined.
- **Cost Savings:** Buses powered by Ford and ROUSH CleanTech offer lower maintenance costs overall, since they do not require the multitude of additional parts to produce cleaner emissions.
- **Parts Continuity:** Ford's 6.8L V10 engines and 6R140 transmissions are used in all of Blue Bird's alternative fuel vehicles including: Propane Vision Bus, Gasoline Vision Bus, CNG Vision Bus and the Micro Bird G5 Propane Bus. By providing one powertrain platform across all alternative fuel types, Ford has made it easy to service the engines for the Blue Bird CNG, Propane and Gasoline buses in your fleet.

Blue Bird buses powered by Ford / ROUSH CleanTech represent the fastest growing segment of the school bus market. Our market research has shown that providing superior after-sale service and support is a primary driver for future bus purchases. Having these exclusive Ford and ROUSH parts available from your local Blue Bird dealer, supported by Blue Bird's state of the art Parts Distribution Center, minimizes downtime and ensures an outstanding after-sale experience. With over 350 exclusive Ford and ROUSH parts available, this catalog will help you locate the parts you require to keep your buses up and running.
